

# SAE PH 20

Heavy Square  
Mast

SAEclimber

Transport Platform  
& Material Hoist  
PH 20

## Technical data on transport platform hoist use

- Single or twin mast hoist configurations
- CE mast dimber and hoist standard agree
- Mast compatible with mast climber P 45 and d hoist h-2000.

PH 20

## Main Safety Devices

- Gear motors self braking type IP55 Protection
- Planetar gears
- Acoustic signal when moving
- Low voltage electrical panel
- Phase control
- Voltage / Phase change device
- Mast protection
- Vertical terminal element with interrupted rack for safety
- Manual descent device in no-power condition
- Double safety limit switches up / down / emergency
- Limit switch for door opening
- Automatic levelling device in tin mast configuration
- Control of mast presence
- Emergency block break

## Technical Data

- Max Height (Higher on request) 200 m
- Height of each square mast section 1.50 m
- Weight of mast section (h.d. galvanized) 105 Kg
- Geared-motors per drive unit 2 x 5.5 Kw
- Block prachute brake included
- Ties every 6 m
- Elevation Speed 12 (m/min)
- Max Payload 2.000 Kg
- Cage Dimensions 3 x 1.5 m
